No adjustments up to 50 mm
Strong and accurate binding
Silent, clean and easy to use

FASTBIND ONE HANDY

Fastbind ONE: the only binding machine you need

Fastbind **ONE Handy** is the ideal binding solution in a digital setting. Highly flexible, this manual perfect binder quickly binds hard and soft cover books as well as tear-off pads or strip binding.

ONE Handy binds all thickness or format size up to A4 portrait or landscape and 40 mm thick without any adjustment between jobs.

Its modern and ergonomic design fits in any environment from a copy shop to a print room. It is quiet, safe, clean, odorless, emissions free with minimal power consumption.

High productivity with constant quality

Designed and manufactured in Finland, Fastbind **ONE Handy** is made to last, whether you make one or 1000 books a day. In serial production, you get a constant quality of binding, with a strong and perfectly square spine each time.

To improve the binding precision, Fastbind **ONE Handy** is equipped with several revolutionary innovations for the book clamp, nipping mechanism and optional PGO Gen 5 roughener.

Easy to use

For your business, we understand that time is money. Fastbind **ONE Handy** is ready to bind in less than 15 minutes from switch on and does not require daily cleaning (unless you use the PUR option). Anyone can learn to use it in minutes, so you do not need long and expensive training sessions or highly qualified operators.

The Sesame system[®] gives you easy access to the book. You just lift the arm, place your book, lower the arm back and turn the Sesame knob to block your book.

Modular design

In Fastbind **ONE Handy**, like in all the binders in the **ONE** family, the modular design enables several upgrades after purchase.

The optional affordable tooling, that can be installed later, includes:

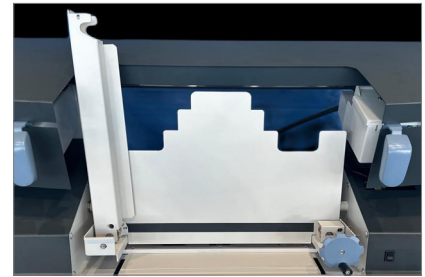

- Hard cover toolkit
- New roughener PGO Gen 5 for the spine preparation
- PUR capability (with ultra-fast start and cleaning) with fume extraction.
